

Dokalam solution soon; forces have might to protect borders: HM

PRESS TRUST OF INDIA
New Delhi, August 21

A SOLUTION TO the "deadlock" at Dokalam between India and China would be found soon, home minister Rajnath Singh on Monday said, adding that the country was well equipped to protect its sovereignty.

The minister, while speaking at an event of the Sino-India border guarding force ITBP here, said he hoped that China would make a positive move to resolve the issue.

"There is a deadlock going on at Dokalam between India and China. I believe there will be a solution soon. I hope China will undertake a positive initiative (to resolve the stand-off)," he said.

The minister said the world knew that India had never cast an evil eye on any country, had never attacked a nation nor did it harbour any expansionist attitude.

"We never want to expand our borders...but I can say that our security forces and defence forces possess all the might to protect our borders," Singh said.

Utkal derailment: Traffic restored; railways promises upgraded safety

PRESS TRUST OF INDIA
New Delhi/Mumbai, August 21

Workers repair the tracks at the derailment site

RAIL TRAFFIC was restored on the Meerut-Muzaffarnagar-Saharanpur section on Monday, two days after the Utkal train derailment, in the wake of which the Railways promised to upgrade safety features on the tracks.

"The 54542 Ambala Meerut city passenger train passed Khatauli (site of last Saturday's accident in UP) at 1:21 am today," the Railways said in a press release.

At least 22 people were killed and 156 injured when 13 coaches of Utkal Express derailed on Saturday evening while it was on its way from Puri in Odisha to Haridwar in Uttarakhand.

The Railways yesterday sent on leave three top officials, including a secretary-level Railway

Board member, suspended four officers and transferred a track engineer, describing it as an "unprecedented" action.

Minister of state for railways Manoj Sinha said a probe is underway to fix responsibility for the accident and unprecedented action would be taken against the guilty.

Sinha told reporters on the sidelines of the ITU-TRAI Asia Pacific Regulators Roundtable in Delhi. Asked whether the preliminary report had pointed to human error for the train mishap, Sinha said, "You are wrongly informed, the inquiry is going on."

On Sunday, Railway Board member (Traffic) Mohd Jamshed had said that equipment to repair tracks was found at the accident spot and that the Commissioner Railway Safety would investigate if unauthorised repair work led to the tragedy.

The major accident, which was prima facie caused by negligence at the local level, has put a spotlight on the safety on the tracks.

"We are embarking on a mission to provide upgraded safety features on coaching stock," a top official of the railways ministry said in Mumbai while requesting anonymity.

For details, investor should refer to and rely on the prospectus, including the section titled "Risk Factor" on page no. 9 of the prospectus, which has been filed with ROC.

The equity shares have not been and will not be registered under the US Securities Act of 1933, as amended (the "Securities Act") and may not be offered or sold within United States (as defined in regulations under the Securities Act) except pursuant to an exemption from, or in a transaction not subject to, the registration requirement of the Securities Act. The equity shares are being offered and sold only outside the United States in offshore transaction in compliance with regulations under the Securities Act and the applicable laws of the jurisdiction where those offers and sales occur.

ISRO looking at consortium for PSLVs

PRESS TRUST OF INDIA
New Delhi, August 21

KNOWN FOR ITS low-cost satellite launches, India's space agency ISRO is looking at a consortium for building launch vehicles to enhance its capacity and capture a larger slice of the global space industry, its chief A S Kiran Kumar said on Monday.

Kiran emphasised on the building capacity within the organisation as well in the domestic industry.

"We are trying to increase the number of launches. We are trying to look at a consortium, a joint venture entity, to build launch vehicles," Kumar said.

ISRO plans to increase the number of PSLVs so that the frequency of launches can match the number of launch vehicles

Earlier this year, ISRO launched 104 satellites in one go, using the Polar Satellite Launch Vehicle (PSLV), its most trusted launcher.

With the consortium, ISRO plans to increase the number of PSLVs so that the frequency of launches can match the number of launch vehicles, he said.

"It is a question of capacity

building to capture a portion of the global market," Kumar told reporters on the sidelines of an event here.

Through its PSLV, the Indian Space Research Organisation has successfully launched foreign satellites at a lower cost.

Kumar said ISRO was also seeking to increase its annual launches to 24, apart from boosting its existing constellation of 42 satellites.

"We are trying to increase the frequency of launches so that we can put sufficient infrastructure in place to meet our communication, remotesensing, earth observation and navigation requirements. Though we have 42 satellites in the orbit, we need more (satellites)," Kumar said.

He said ISRO was also gearing up for its Moon mission Chandrayaan 2. This would involve releasing a lander on the surface of the Moon.

He said the space agency has asked for proposals from the scientific community on the possible programmes that could be launched for its inter-planetary missions for Venus, Mars and some asteroids.

According to the government, the average annual revenue of the international satellite market over the last three years is approximately \$200 billion.

Need tougher laws for occupational safety, says UP minister

FE BUREAU
Noida, August 21

UTTAR PRADESH LABOUR and service planning minister Swami Prasad Maurya said on Monday there was a strong need for tougher laws for occupational safety and health standards in the industry.

The minister was addressing an interactive session on occupational safety and health standards, organised by the Indian-American Chamber of Commerce. "If employers start accepting and treating their employees as their family members, it will make them think more about their safety. This will not only lead to a happy employer-employee relationship but also enhance productivity," he said, emphasising the need to set up an Industrial Higher Education University in UP.

In his welcome address, Ashish Wig, chairman, NIC Infrastructure Committee, Indo-American Chamber of Commerce, highlighted the occupational safety hazards in the infrastructure industry, which employs more people than the farming sector. Lalit Bhacin, executive vice-president, IACC, said that there were not enough laws and training to ensure quality occupational safety and health standards in India.

The event was also attended by Anurag Srivastava, deputy director, factories, Noida; Sanjay Mehta, regional president, IACC; MN Siddique, ex-director of factories, UP; MR Rajput, director, DGFASLI-RLI, Faridabad; and MS Tiwari, general manager (Fire & Safety), Hindalco Industries (Renuko), among other key officials and experts.

Looking for ways to minimise fake news on platform: WhatsApp

PRESS TRUST OF INDIA
New Delhi, August 21

POPULAR SOCIAL MEDIA WhatsApp on Monday said it is exploring ways to check spread of fake news through its platform.

The WhatsApp software engineer Alan Kao told the situation as "complex" because of the end-to-end encryption of messages on the platform that does not allow anyone — to read the messages and receiver — to read the messages.

"We definitely do not want to see fake news on our platform and it's a complex problem in determining what is fake and what isn't. Because of the encryption, we can't report the contents of the messages," Kao told reporters here.

He added that the Facebook-owned company is looking at different ways in which they can tweak the product to "try and minimise" fake news.

There have been a number of instances, featuring rumours of the new currency notes including a GPS chip and videos related to Muzaffarnagar riots, that were circulated and shared virally on WhatsApp as many took them to be true.

With over 200 million users, India is the largest market for WhatsApp that has about 1.3 billion users globally.
